

## Prerequisites and Desired Qualifications

As our SAP integration partner, you are ready and willing to integrate SQA into your projects. The prerequisites for this are similar to setting up an implementation project and need to be validated by our integration partners and customers. As is usual for ensuring a project is completed successfully, good communication structures and being prepared to share project details are crucial. It is also important for key users with knowledge of the various processes to be available.

Consultants who meet the following criteria are ideally qualified to serve as a counterpart to our advisors:

### SD/MM consultant with

- At least five years' experience in SAP SD/MM implementation
- Experience in oil & gas processes
- Basic knowledge of ABAP (debugging)
- Experience in the SAP Activate methodology is a strong plus

### ABAP developer

- At least 5 years' experience in SAP project implementation
- Object-orientated programming
- Web Dynpro applications
- CDS views
- Interface (IDOCs, etc.)
